

CITY OF DOWAGIAC
2011 Biennial Energy Optimization Plan
MPSC Case No. U-16698

Introduction

This Biennial Energy Optimization Plan Review filing by the City of Dowagiac complies with Public Act 295 of 2008 (the Act) and the related March 17, 2011 Michigan Public Service Commission Order (MPSC Case No. U-16698). This filing serves as an application for review and revision of the 2012 program and a new plan review for the years 2013, 2014 and 2015. This Energy Optimization (EO) Plan was developed in three sections consistent with the City of Dowagiac 2009 EO Plan filing:

- Section 1 will address each requirement under PA 295 Section 71, Subsection 3 (a-i).
- Section 2 will address the requirements under Attachment E of the MPSC Temporary Order U-15800
- Section 3 has additional information under MPSC Temporary Order U-15800

The 2012-15 programs were developed utilizing the same methodology that the MPSC approved on July 1, 2009 for the City of Dowagiac 2009-12 EO plan.

SECTION 1: PA 295 SECTION 71 SUBSECTION 3 REQUIRMENTS

Section 71 (3) (a) The EO plan shall offer programs to each customer class including low-income customers;

The table below shows the total incremental megawatt hour savings required by PA 295 for the City of Dowagiac Energy Optimization programs for years 2012-2015.

| <i>Savings is reported in Megawatt hours</i> | | | Total Savings Required |
|--|-----------------|-------------------|-------------------------------|
| Program Year | % Saving | Sales Year | MWH |
| 2012 | 1.00% | 2011 | 651 |
| 2013 | 1.00% | 2012 | 695 |
| 2014 | 1.00% | 2013 | 707 |
| 2015 | 1.00% | 2014 | 711 |

The City of Dowagiac developed its Energy Optimization programs to serve all customer classes, including residential low-income. The City of Dowagiac Plan for 2012-2015 is based on allocating approximately 5% of its EO budget to low-income program, 22% to residential, 65% to commercial and industrial, and 8% to evaluation and administration. Program allocations will be revised on an annual basis in order to continue meeting the goals under PA 295.

Programs that will be offered to each rate class are listed below and are categorized into Low-Income Services, Residential Solutions and Business Solutions. A detailed list of budget amounts and the associated kilowatt savings for each customer class can be found in Attachment A. Program descriptions with budgets and estimated participation levels of the programs that will be offered are included in Attachment B.

Residential Low-income Services

The City of Dowagiac will spend 5% of the program budget on low-income programs. Target market for this program continues to be residential customers whose income is estimated to be below 200% of poverty level as defined by the U.S. Department of Health and Human Services. Services will be targeted to diverse segments of the population including those living in single family and multi-family buildings, home owners and renters, and to the extent possible – age and geographic diversity. This program provides funding to upgrade the electric energy efficiency of customers living on limited incomes, thereby lowering their energy bills.

Residential Solutions

The programs below will be available to all City of Dowagiac Residential Electric Service Rate(s).

- *Residential Services (appliance recycling, lighting, HVAC, etc)*
- *Residential Education Services*

Business Solutions

The programs below will be available to all City of Dowagiac commercial and industrial customers billed on: General Service, Public Service, Municipal Water Service, Large General Service, and Security Light rates.

- *Business Services (prescriptive and custom)*
- *Business Education Services*

Section 71 (3) (b) The EO plan shall specify the necessary funding level;

In order to achieve the mandatory energy savings targets, the City of Dowagiac's Energy Optimization Plan will require the estimated funding levels shown in the table below.

| <i>Expenditures Percentage of Retail Sales</i> | | | Total Spending \$ |
|--|-----------------------|-----------------------|----------------------------------|
| Program Year | % Spending | Sales Year | |
| 2012 | 2.0% | 2010 | 101,788 |
| 2013 | 2.0% | 2011 | 111,749 |
| 2014 | 2.0% | 2012 | 121,779 |
| 2015 | 2.0% | 2013 | 122,557 |

Note: Expenditures for 2013, 2014 & 2015 are estimates and may be revised as actual data becomes available.

Section 71 (3) (c) Describe how EO program costs will be recovered from customers;

All costs associated with the implementation of the City of Dowagiac Energy Optimization Plan will be recovered consistent with Section 89 (2) of Public Act 295. Residential customers will be charged on a volumetric basis; primary and secondary customers will be charged on a per meter basis.

The costs for primary customers will not exceed 1.7% of total retail revenues for that customer class and for residential and secondary will not exceed 2.2% of total retail revenues for those customer classes. [PA 295 Section 89 (3)]

The City of Dowagiac surcharges for the EO programs are listed in the table below. These surcharges will be evaluated on a periodic basis and revised as needed to ensure adequate funding of the proposed programs.

The estimated monthly charges are shown in the table below.

| Levelized Surcharges | | 2012-15 |
|-----------------------------|-----------|----------------|
| Residential | Per kWh | \$0.00100 |
| Secondary | Per meter | \$7.83 |
| Primary | Per meter | \$237.51 |

Section 71 (3)(d) Ensure, to the extent feasible, that charges collected from a particular customer rate class are spent on EO programs for that rate class;

Charges for each customer class were developed based on the approximate percentage of programs budget allocations that will be offered for that customer class to the extent feasible.

Section 71 (3) (e) Demonstrate that proposed EO funding is sufficient to ensure achievement of EO savings standards;

The City of Dowagiac Program Portfolio was prepared by Janet Brandt from Morgan Marketing Partners to outline goals, budgets, and programs that have the potential to achieve the targets identified in PA 295. The programs described in this plan were modeled based on typical measure characteristics used in similar “best practice” programs across the country, along with specific savings estimates from the new Michigan Deemed Savings Database.

Section 71 (3)(f) Specify whether electric energy savings will be based on weather normalized sales or the average megawatt hours of electricity sold by the provider annually during the previous 3 years to retail customers;

The incremental energy savings for the City of Dowagiac Energy Optimization Plan will continue to be calculated utilizing the average number of megawatt hours of electricity sold annually during the previous three years to retail customers.

Section 71 (3) (g) Demonstrate that the providers EO programs, excluding low-income programs, are collectively cost-effective;

The City of Dowagiac programs were designed to meet the cost-effective tests as required under PA 295 Sec. 73 (2). The two primary tests that were used to determine if the programs are reasonable and prudent are the Utility System Resource Cost Test and the Cost of Conserved Energy. The definitions according to the California Standard Practices Manual for each of these tests are as follows:

Utility System Resource Cost Test

The Utility System Resource Cost Test measures the net costs of an energy efficiency program as a resource option based on the costs incurred by the utility (including incentive costs) and excluding any net costs incurred by the participant.

Cost of Conserved Energy

The Cost of Conserved Energy is the average lifecycle cost of an efficiency measure or program expressed in cents per kWh saved over the life of the installed measures.

A table of each program with the Utility Cost Test results and the estimated Cost of Conserved Energy is shown below.

| Portfolio Category | Program | UCT Results | CCE Results* |
|--------------------------------|----------------------|--------------------|---------------------|
| | Low-income | N/A | N/A |
| Residential | Residential Services | 3.0 | \$0.02 |
| | Education Services | 4.1 | \$0.01 |
| | | | |
| Business | Business Services | 4.3 | \$0.01 |
| | Education Services | 4.1 | \$0.01 |
| Projected Annual Totals | | 3.8 | \$0.01 |

*The CCE is the present value of the program costs divided by the lifetime savings (\$/kWh).

Section 71 (3) (h) Provide for practical and effective administration of the EO programs;

The overall administration of the City of Dowagiac Energy Optimization Plan will continue to be the responsibility of City of Dowagiac personnel with implementation contractors selected in 2012-2015 as needed. The City of Dowagiac will make use of experienced City of Dowagiac in-house personnel who will assure quality and compliance by providing oversight, guidance and direction to the outside implementation contractors. City of Dowagiac personnel will also work with the implementation contractors who have qualified and experienced staff with the technical capabilities and data tracking systems necessary to deliver the programs effectively. This combination will assure effective and efficient program administration.

Section 71 (3) (i) include a process for obtaining independent expert evaluation of the actual EO savings;

The City of Dowagiac contracted with KEMA Inc. as the independent third-party for the expert evaluation of the EO programs for 2009 through 2011. This contractor was responsible for verifying the incremental gross energy savings from each EO program and providing an annual report of such findings. An evaluation contractor will be selected to provide these same services for the 2012-2015 programs.

SECTION 2: REQUIREMENTS UNDER ATTACHMENT E of MPSC Temporary Order U-15800

MPSC Attachment E Section 3 (a) Plan Elements;

Energy Optimization Plan Development Methodology

The City of Dowagiac 2012–2015 Energy Optimization Program Portfolio outlines goals, budgets and programs that are designed to achieve the energy conservation targets identified in Michigan legislation Public Act 295 (PA 295). The programs in this plan were based on typical measure characteristics used in similar “best practice” programs across the country, along with specific savings estimates from the new Michigan Deemed Savings Database.

The programs were developed utilizing the same methodology that was used in the 2009-2012 City of Dowagiac plan that were approved by the MPSC on July 1, 2009. Specifically, the programs were selected based on the following objectives:

- To provide electric energy savings for residential and commercial/industrial customers through a portfolio of proven “best practice” energy efficiency programs that are cost-effective from a Utility System Resource Cost perspective;
- To develop program designs that can achieve the required energy savings goals within the specified budget caps identified in PA 295;
- To recommend potential opportunities to leverage program funding with other state, regional, and national efforts.
- Incentives are only offered on measures that exceed current codes and standards and are often “tiered” to encourage customers to implement the highest level of efficiency available.

The DSMore model was used to conduct the benefit-cost analysis, using the City of Dowagiac projected avoided costs. The model calculates benefit-cost results for each of the major and nationally-defined perspectives: Participant Test, Rate Impact Test, Total Resource Cost Test, and the Utility System Resource Cost Test, as well as the Cost of Conserved Energy.

MPSC Attachment E Section 1 (e) Plan Requirements;

Other cost-effective tests were utilized to determine cost effectiveness of the City of Dowagiac programs. Brief definitions of those tests according to the California Standard Practices Manual are:

Utility System Resource Cost Test (UCT)- The Utility System Resource Cost Test measures the net costs of an energy efficiency program as a resource option based on the costs incurred by the utility (including incentive costs) and excluding any net costs incurred by the participant.

Total Resource Cost Test (TRC)-The Total Resource Cost Test measures the net costs of an energy efficiency program as a resource option based on the total costs of the program, including both the participants' and the utility's costs. This test incorporates both the utility's costs and the customers costs associated with purchasing and installing an energy efficiency measure. For DSM programs, those that pass the TRC test with a ratio of greater than 1 is viewed as beneficial to the

utility and its customers because the savings in electric costs outweigh the DSM costs.

Participant Test (PCT)-The Participants Test is the measure of the quantifiable benefits and costs to the customer due to participation in a program.

The Ratepayer Impact Measure Test (RIM)-The Ratepayer Impact Measure (RIM) test measures what happens to customer rates due to changes in utility revenues and operating costs caused by the program. This test indicates the direction and magnitude of the expected change in customer rate level for both participating and non-participating customers.

A table with the multiple cost-effectiveness tests required for each program is shown below:

| Portfolio Category | Program | Utility System Resource Cost Test | Total Resource Cost Test | Participant Test | Rate Impact Measure |
|---|-----------------------|-----------------------------------|--------------------------|------------------|---------------------|
| Residential | Low-income | N/A | N/A | N/A | N/A |
| | Residential Services | 3.0 | 2.2 | 4.7 | 0.6 |
| | Educational Services | 4.1 | 4.1 | No Cost | 0.6 |
| | Residential Portfolio | 3.1 | 2.3 | 5.1 | 0.6 |
| Business | Business Services | 4.3 | 1.9 | 2.7 | 0.6 |
| | Educational Services | 4.1 | 4.1 | No Cost | 0.5 |
| | Business Portfolio | 4.3 | 1.9 | 2.7 | 0.6 |
| Total Portfolio (with administrative \$) | | 3.8 | 1.9 | 3.0 | 0.6 |

MPSC Attachment E Section 3 (b-f) Plan Elements;

b) The EO portfolio summary (MPSC Table 2) can be found in Attachment A and a summary of each program (MPSC Table 1) is shown in Attachment B. Savings estimates for all measures are based on the Michigan Deemed Savings Database. The City of Dowagiac will reserve 20% of overall budget (by customer class) which will ensure program flexibility and allow for reallocation of funding to other programs that are more cost-effective or where technology or market participation impacts require additional resources, but will respect spending criteria among customer classes.

c) Three percent of the EO budget will be used on education programs. These budget expenditures will communicate and educate customers on the benefits of

energy efficiency, conservation and load management. Budget funds for education will be deemed to generate a proportional amount of the required energy savings for each program year in which the money is spent. City of Dowagiac programs are designed to include an education component for both the Residential and Business customers.

d) The City of Dowagiac Plan includes a residential low-income program and costs for this program will be recovered from each customer rate class in proportion to that rate class' funding of all programs.

e) The City of Dowagiac has set aside no more than 8% of program budget for program evaluation, measurement and verification activities to determine actual program energy savings.

SECTION 3: ADDITIONAL INFORMATION

Comment Proceedings;

An opportunity to convey public comments for the City of Dowagiac 2011 Biennial Energy Optimization Plan for 2012-2015 was communicated to all customers through a public hearing notice placed in the local newspaper and on the city's website. All public comments received on the Biennial Energy Optimization Plan will either accompany this plan or be submitted to the MPSC prior to September 30, 2011.

Michigan Saves Program;

The City of Dowagiac supports the financing programs that are offered under the Michigan Saves Program that help customers invest in high-efficiency equipment and improvements to their homes and businesses.

Coordination of Energy Optimization Programs;

The City of Dowagiac has been and will continue to participate in the EO Collaborative monthly meetings organized by the MPSC through its membership with MMEA. These meetings allow for the evaluation of program development and delivery options that may improve program administration and delivery efficiencies.

Dowagiac's

Energy Optimization Plan

2012-2015

Program Descriptions

Dowagiac's Proposed Energy Optimization Programs - Table 1

| Program Element | Services for Residential Customers with Limited Incomes | | | | | | | | | | | | | | | |
|--|--|------|------|--|--|--|--|--|------|------|------|------|-----|-----|-----|-----|
| Objective | <ul style="list-style-type: none"> • Provide recommendations, financial assistance and education to customers with limited income to assist them in reducing their electric energy use and managing their utility costs. • Coordinate low-income services with local weatherization providers and other agencies in order to provide comprehensive assistance at lower administrative costs. | | | | | | | | | | | | | | | |
| Target Market | <ul style="list-style-type: none"> • Residential customers whose income is estimated to be below 200% of poverty level. Services will be targeted to diverse segments of the population including those living in single family and multi-family buildings, homeowners and renters, and to the extent possible – age and geographic diversity. | | | | | | | | | | | | | | | |
| Program Duration | Services for customers with limited income will be an ongoing element of the program portfolio. | | | | | | | | | | | | | | | |
| Program Description | Services for customers with limited income will be closely coordinated with local weatherization agencies and other applicable State and municipal programs. In an ongoing effort, the utility intends to work with the agencies responsible for implementing the Federal LIHEAP program to leverage their funding by subsidizing the installation of all cost-effective electric measures, thereby increasing the number of homes served through the program. | | | | | | | | | | | | | | | |
| Eligible Measures | Cost effective electric measures that will be permissible for this program include replacement of inefficient lighting/equipment with ENERGY STAR labeled products including CFL's, refrigerators, dehumidifiers, room air conditioners, and furnaces with high-efficiency motors. Other eligible measures include smart power strips to reduce the energy use of computers, printers, TVs, and other electronic equipment. | | | | | | | | | | | | | | | |
| Implementation Strategy | This program will be coordinated with the local weatherization agencies to subsidize the installation of all cost-effective electric measures. | | | | | | | | | | | | | | | |
| Marketing Strategy | <p>Marketing will be closely coordinated with the local weatherization agencies. Key elements of the marketing strategy include:</p> <ul style="list-style-type: none"> • Targeted outreach through local agencies • Municipal website and newsletter • Press release | | | | | | | | | | | | | | | |
| EM&V Requirements | Evaluation activities for the residential low-income program will focus on verification and assessment of electric energy impacts for the installed measures. | | | | | | | | | | | | | | | |
| Estimated Participation | <table border="1" data-bbox="472 1650 1446 1833"> <thead> <tr> <th colspan="4" data-bbox="472 1650 1446 1713">Participation (in Units of Installed Measures)</th> </tr> <tr> <th data-bbox="472 1713 716 1776">2012</th> <th data-bbox="716 1713 959 1776">2013</th> <th data-bbox="959 1713 1203 1776">2014</th> <th data-bbox="1203 1713 1446 1776">2015</th> </tr> </thead> <tbody> <tr> <td data-bbox="472 1776 716 1833">268</td> <td data-bbox="716 1776 959 1833">286</td> <td data-bbox="959 1776 1203 1833">290</td> <td data-bbox="1203 1776 1446 1833">292</td> </tr> </tbody> </table> | | | | Participation (in Units of Installed Measures) | | | | 2012 | 2013 | 2014 | 2015 | 268 | 286 | 290 | 292 |

| | | | | |
|-------------------------|--|-------------|-------------|-------------|
| Estimated Budget | Annual Budgets | | | |
| | 2012 | 2013 | 2014 | 2015 |
| | \$5,406 | \$5,770 | \$5,864 | \$5,901 |
| Savings Targets | Energy Savings (Gross Annual kWh) | | | |
| | 2012 | 2013 | 2014 | 2015 |
| | 16,362 | 17,465 | 17,748 | 17,862 |

| | |
|----------------------------|---|
| Program Element | Residential High Efficiency Products Program |
| Objective | Produce long-term coincident peak demand reduction and annual energy savings in the residential sector by promoting high-efficiency lighting, appliances, and HVAC equipment. |
| Target Market | Residential customers seeking to purchase and install new central air conditioning units, furnaces, heat pumps, setback thermostats, refrigerators, freezers, dishwashers, room air-conditioners, dehumidifiers, clothes washers and dryers, water heaters, and/or lighting products. |
| Program Duration | Ongoing element of the program portfolio. |
| Program Description | <p>The High-Efficiency Products program will leverage the nationally-recognized ENERGY STAR brand, when applicable, to promote products that can reduce electric energy use. Energy efficient choices can save families about a third on their energy bill, without sacrificing features, style or comfort. The ENERGY STAR brand helps consumers make the most energy efficient choice.</p> <p>The program will focus on three major markets:</p> <ul style="list-style-type: none"> • contractor-installed heating, cooling, and water-heating equipment • retail sales of appliances • retail sales and direct marketing of lighting products <p>The High-Efficiency Products Program will promote premium efficiency furnaces that have high-efficiency motors (electrically commutated motors – ECMs). ECM motors save electric energy during the heating and cooling seasons. Since the primary type of heating system in the utility’s service area is natural gas forced air, this program will closely coordinate with the local natural gas provider so that incentives can be coordinated on units that have the high-efficiency motors. Incentives for the installation of setback thermostats will also be available.</p> <p>Although federal efficiency standards for central air-conditioning have recently increased, there are still opportunities to promote units that exceed the current standards and thus achieve additional energy savings. The program will provide incentives for high-efficiency central air-conditioners with an SEER rating > 14.</p> <p>The program will also offer incentives for high-efficiency electric water heaters, heat pump water heaters, and solar water heating systems. Incentives will also be provided for contractor-installed, residential-sized, photovoltaic systems.</p> <p>The High-Efficiency Products Program will also provide incentives to customers to encourage them to replace their older, inefficient appliances with high-efficiency units.</p> <p>The High-Efficiency Products Program will also provide opportunities for customers to use</p> |

| | |
|---------------------------------------|--|
| | <p>efficient lighting by receiving the products directly and/or by providing market incentives and market support through retailers to build market share and usage of ENERGY STAR lighting products. The program targets the purchase of lighting products through in-store promotion as well as special sales events. The program will also provide convenient recycling for CFL's at local retailers and customer service outlets.</p> <p>Finally, the program will also educate customers on the energy use of electronic entertainment and office equipment in the home and encourage customers to utilize an advanced power strip to turn off equipment when not in use.</p> |
| <p>Eligible Measures</p> | <p>Eligible measures include:</p> <ul style="list-style-type: none"> • Central Air Conditioners (SEER > 14) • Furnaces with ECM Motors • Air-Source, Dual-Fuel, and Ground Source Heat Pumps (SEER > 14) • Electric Water Heaters (EF >=.95) • Heat Pump Water Heaters (EF >= 2.0) • Setback Thermostats • High-Efficiency Pool Pumps • ENERGY STAR Room Air Conditioners, Dehumidifiers, Refrigerators, Freezers • Clothes Dryers (with moisture sensor) • ENERGY STAR lighting products (CFLs, CFL Specialty Bulbs, Fixtures, LED Holiday Lights, and Ceiling Fans.) • Advanced Power Strips |
| <p>Implementation Strategy</p> | <ul style="list-style-type: none"> • Contractor/retailer recruitment, education and outreach. The utility's implementation contractor will utilize a field representative to facilitate the recruitment of local HVAC/plumbing contractors and appliance/lighting retailers to participate in the program. • Planning coordination with local natural gas provider. The utility's implementation contractor will work closely with the natural gas utility to coordinate incentive levels, eligibility requirements, marketing materials, and contractor outreach. • Lighting Product distribution. The utility will distribute lighting products through special mailings and/or community groups and events. • Bulb recycling: The utility will deploy recycling bins for bulb collection at area businesses. Participants will be given training on proper sealing, labeling, and transportation for the bins. • Application processing: The utility's implementation contractor will coordinate processing of all rebate applications. |

| <p>Marketing Strategy</p> | <p>The HVAC and water heater components of the program will be primarily marketed through local contractors, the most direct influencers of customer purchase decisions. Contractors will receive educational materials to share with their customers as well as access to cooperative advertising dollars.</p> <p>The appliance and lighting components of the program will be marketed through local retailers. All marketing materials will carry a strong consumer education message emphasizing the cost of operating older, inefficient appliances and the benefits of early replacement with ENERGY STAR qualified models (lifetime dollar savings, energy savings, lower noise, etc.). Marketing materials will leverage the ENERGY STAR brand, which enjoys a high level of consumer recognition and favorable associations.</p> <p>Key elements of the marketing strategy include:</p> <ul style="list-style-type: none"> • Direct consumer marketing through website and newsletter • Press release • Point-of-purchase displays • Cooperative advertising with contractors/retailers | | | | | | | | | | | | |
|---|--|---|-------------|--|--|-------------|-------------|-------------|-------------|----------|----------|----------|----------|
| <p>EM&V Requirements</p> | <p>Savings values were based on documented values from the Michigan Energy Measures Database. Evaluation activity will focus on verification of installation and estimates of deemed savings.</p> | | | | | | | | | | | | |
| <p>Estimated Participation</p> | <table border="1" data-bbox="472 926 1239 1115"> <thead> <tr> <th colspan="4">Participation (in Units of Installed Measures)</th> </tr> <tr> <th>2012</th> <th>2013</th> <th>2014</th> <th>2015</th> </tr> </thead> <tbody> <tr> <td>2,387</td> <td>2,548</td> <td>2,589</td> <td>2,606</td> </tr> </tbody> </table> | Participation (in Units of Installed Measures) | | | | 2012 | 2013 | 2014 | 2015 | 2,387 | 2,548 | 2,589 | 2,606 |

| Program Element | Appliance Turn-In and Recycling Program |
|--------------------------------|---|
| Objective | Produce long-term coincident peak demand reduction and annual energy savings in the residential sector by removing operable, inefficient refrigerators, freezers, dehumidifiers, and room air conditioners from the power grid and recycling them in an environmentally safe manner. |
| Target Market | Residential customers who are currently operating older, inefficient refrigerators, freezers, dehumidifiers, and/or room air conditioners either as primary or secondary units. |
| Program Duration | Ongoing element of the program portfolio. |
| Program Description | The average household replaces a refrigerator every ten years. However, many of the refrigerators being replaced are still functioning, so they often become backup appliances – energy guzzlers in basements and garages – or sold in a used-market. The Turn-In Program targets those “second” refrigerators and freezers, as well as encouraging the early retirement of older inefficient appliances that are still operable. The program provides the dual benefit of cutting energy consumption and keeping the appliances out of the used-market. |
| Eligible Measures | Eligible measures include refrigerators, freezers, dehumidifiers, and room air conditioners. Units must be operable at the time of disposal. |
| Implementation Strategy | <ul style="list-style-type: none"> • Turn-key appliance pick-up/recycling: The utility will select a qualified recycling service subcontractor to provide comprehensive, turn-key implementation services from eligibility verification and scheduling of pick-ups to proper disposal and recycling of turned-in appliances. • Drop-off events for dehumidifiers and room air conditioners to be coordinated and managed by local recycling specialists. • Incentive coordination and processing: The utility will coordinate prompt processing of incentive payments. |
| Marketing Strategy | <p>All marketing materials will carry a strong consumer education message emphasizing the cost of operating older, inefficient appliances, the benefits of early replacement with ENERGY STAR qualified models, and the importance of proper disposal and recycling of older units. Key elements of the marketing strategy include:</p> <ul style="list-style-type: none"> • Direct consumer marketing through website and newsletter • Press release • Website links to EPA’s new “ENERGY STAR Recycle My Old Fridge Campaign” at www.recyclemyoldfridge.com. Includes calculators to estimate savings. • Point-of-purchase displays • Cooperative advertising with retailers • Posters in area businesses |

| EM&V Requirements | Deemed savings values were based on documented values from the Michigan Energy Measures Database (MEMD). Evaluation activity will focus on verification of recycled units and estimates of deemed savings. | | | | | | | | | | | | | | | |
|---|---|-------------|-------------|--|---|--|--|--|-------------|-------------|-------------|-------------|---------|----------|----------|----------|

| Program Element | Residential Education Services | | | | | | | | | | | | | | | |
|-----------------------------------|---|---------|---------|--|-----------------------------------|--|--|--|------|------|------|------|---------|---------|---------|---------|
| Objective | <ul style="list-style-type: none"> To develop broad consumer awareness of the benefits of energy efficiency. To provide educational materials and services that motivate customers to participate in the utility's energy optimization programs and to motivate behavior change that can further reduce energy consumption. | | | | | | | | | | | | | | | |
| Target Market | All residential customers | | | | | | | | | | | | | | | |
| Program Duration | Ongoing element of the program portfolio. | | | | | | | | | | | | | | | |
| Program Description | The municipal utility will implement educational outreach initiatives to build and expand consumer awareness of energy efficiency and energy conservation opportunities. Dowagiac will allocate 1.5% of the total energy optimization budget for residential educational activities, with a 1.5% contribution to the residential energy savings goal. | | | | | | | | | | | | | | | |
| Eligible Measures | Not applicable for this program. | | | | | | | | | | | | | | | |
| Implementation Strategy | <p>The following types of initiatives will be considered for implementation:</p> <ul style="list-style-type: none"> Develop, produce, and distribute energy efficiency tips and information about the energy efficiency portfolio through bill inserts and newsletters. Enhance the website to facilitate easy access to educational materials/programs. Provide energy education/awareness booths at scheduled community fairs. Promote and deliver special energy workshops for targeted groups of participants, including distribution of free energy-saving products. | | | | | | | | | | | | | | | |
| Marketing Strategy | See implementation strategy for a list of marketing activities. | | | | | | | | | | | | | | | |
| EM&V Requirements | Educational activities will be documented and number of customers reached recorded. | | | | | | | | | | | | | | | |
| Estimated Participation | To be determined. | | | | | | | | | | | | | | | |
| Estimated Budget | <table border="1"> <thead> <tr> <th colspan="4">Annual Budgets</th> </tr> <tr> <th>2012</th> <th>2013</th> <th>2014</th> <th>2015</th> </tr> </thead> <tbody> <tr> <td>\$1,527</td> <td>\$1,676</td> <td>\$1,827</td> <td>\$1,838</td> </tr> </tbody> </table> | | | | Annual Budgets | | | | 2012 | 2013 | 2014 | 2015 | \$1,527 | \$1,676 | \$1,827 | \$1,838 |

| Program Element | Comprehensive Business Solutions |
|----------------------------|---|
| Objective | <p>There are three primary objectives for the Comprehensive Business Solutions Program:</p> <ol style="list-style-type: none"> 1) Increase the market share of a targeted group of commercial high-efficiency electric technologies sold through market channels. 2) Increase the installation rate of a targeted group of high-efficiency electric technologies in commercial facilities by businesses that would not have done so in the absence of the program. 3) Affect the installation of site-specific and unique energy efficiency technologies and process improvements (that do not fit the parameters of the targeted incentive offerings) by business customers that would not have done so in the absence of the program. |
| Target Market | <p>All business customers are eligible to participate in the Comprehensive Business Solutions Program when they purchase qualifying equipment. However, the program will utilize a targeted outreach strategy to influence specific markets.</p> <ol style="list-style-type: none"> 1) Market Providers (wholesalers, distributors, engineering and architectural firms, developers, and builders) that will promote the qualifying technologies 2) High-impact/high-need customer sectors (such as schools, municipal buildings, hospitals, food service, and hospitality) |
| Program Duration | Ongoing element of the program portfolio. |
| Program Description | <p>The utility is interested in providing a seamless set of energy efficiency services to its business customers. Therefore, the Comprehensive Business Solutions Program will provide both a prescriptive and a custom approach, depending on the business' needs.</p> <p>The program will affect the purchase and installation of high-efficiency technologies through a combination of market push and pull strategies that stimulate market demand while simultaneously increasing market provider investment in stocking and promoting them.</p> <p>The program will increase demand by educating business customers about the energy and money saving benefits associated with efficient products and equipping market providers to communicate those benefits directly to their customers. To address the first-cost barrier for customers, the program will utilize financial incentives (i.e. cash-back mail-in rebates) averaging 20% to 40% of the incremental cost of purchasing qualifying technologies.</p> <p>The program will stimulate market provider investment in stocking and promoting efficient products through a targeted outreach effort. The implementation contractor will employ field sales representatives to proactively train and equip market providers to convey the energy and money saving benefits to consumers. Further, the existence of cash-back incentives will elevate efficiency to a competitive issue that will naturally motivate market providers to stock and promote targeted products.</p> <p>The custom component of the program helps customers and market providers identify more complex energy savings projects, analyze the economics of each project, and complete a customized incentive grant application. Over the long term, the custom solutions approach will allow the utility to develop and enhance the assistance they can provide to businesses with unique opportunities – including industrial process improvements, emerging</p> |

| | |
|--------------------------------|---|
| | <p>technologies, and new facility design and/or modernization.</p> <p>The Business Services program will also include a new construction/renovation component that will assist customers in specifying and installing high efficiency measures and establishing effective commissioning on the long term performance of the building.</p> <p>Finally, the program will also offer a “direct-install” component to a targeted group of small businesses, offering free or subsidized installation of lighting upgrades and setback thermostats.</p> |
| Eligible Measures | Eligible measures are listed in Table 2. |
| Implementation Strategy | <ul style="list-style-type: none"> • Outreach to market providers. The implementation contractor will inform and recruit participating market providers. Outreach will include orientation meetings and conducting in-person visits aimed at training and equipping market providers to communicate program information to customers. The Contractor will ensure that providers have an updated stock of program materials. Key market providers that will be targeted include: <ul style="list-style-type: none"> • Lighting distributors, wholesalers, • HVAC distributors and retail contractors • Motors/compressed air vendors • Food service equipment distributors and retailers • Engineering and Architectural firms • Developers and Builders in the commercial market • Outreach to targeted customers. The implementation contractor will personally contact energy managers and decision makers within the targeted customer sectors. The Contractor will assist business customers in determining whether the prescriptive incentives or the custom approach would be most appropriate for their operations. The utility’s business account representatives will assist with outreach within the course of their regular contacts with business customers. |
| Marketing Strategy | <p>The Comprehensive Business Solutions Program will employ the following marketing strategies:</p> <ul style="list-style-type: none"> • Engage market providers. Outreach and training will be provided to a targeted group of providers that have business motivations for promoting incentives to their customers. • Outreach to targeted customers. The utility’s implementation contractor will work closely with the utility to identify and conduct face-to-face meetings with key end-use customers to recruit their participation. The contractor will target decision makers within the customer’s organization including: energy managers, facility managers, financial and operations managers, chief engineer and facility/property managers, maintenance supervisors, and building operators. • Outreach to key influencers. The implementation contractor’s energy advisor(s) will work to generate awareness of the program through presentations and seminars with appropriate trade associations (ASHRAE, BOMA, school administrators, etc.). • Provide complete website presence. The program will be comprehensively outlined on the utility website. Customers and market providers will be able to review qualifying measures and download incentive applications. |
| EM&V Requirements | The utility’s implementation contractor will be responsible for implementing the following types of measurement and verification activities to facilitate the utility’s third-party evaluation work: |

| | <ul style="list-style-type: none"> • Collect and track all customer, measure installation, and incentive data. • Verify that each product on which incentives are paid meets the prescribed efficiency standards using third party databases (e.g. ENERGY STAR, GAMA, ARI). Products that cannot be verified using a credible third party database will be considered on a case-by-case basis; product performance information will be requested from the contractor or manufacturer and efficiency will be verified by a qualified engineer. • Provide engineering support to identify and analyze the cost-effectiveness of energy saving opportunities. The energy advisor will work with the customer and/or market provider to complete custom engineering calculations that assess the energy savings potential, payback horizon, project eligibility, and incentive amount. If the project is deemed eligible, the advisor will assist the customer or market provide in completing a custom incentive grant application. • Conduct on-site inspections of 2% to 5% of equipment for which customers receive incentives to verify that products were installed and that the model and serial numbers match those provided on the incentive claim. Any inconsistencies will be researched and the resolution recorded. Market providers associated with inconsistencies will receive follow up inspections on projects that they are associated with. | | | | | | | | | | | | |

TABLE 2 – ELIGIBLE MEASURES

| <i>Residential Measures</i> | <i>Proposed Incentive</i> | <i>Unit</i> |
|--|---------------------------|-------------|
| CFL bulbs (or other new high efficiency lighting technology) | \$1.50-\$3.00 | Lamp |
| CFL bulbs specialty | \$2.50 | Lamp |
| CFL bulbs high wattage | \$5.00 | Lamp |
| CFL fixtures | \$15.00 | Fixture |
| LED task light | \$5.00 | Fixture |
| LED holiday lights | \$3.50 | 25 string |
| ENERGY STAR ceiling fan with light | \$15.00 | Unit |
| Advanced power strip plug outlet | \$10.00 | Unit |
| High efficiency electric clothes dryer (w moisture sensor) | \$25.00 | Unit |
| ENERGY STAR clothes washers | \$50.00 | Unit |
| ENERGY STAR dehumidifier | \$25.00 | Unit |
| ENERGY STAR room AC | \$30.00 | Unit |
| ENERGY STAR refrigerator/freezer | \$25.00 | Unit |
| Refrigerator and/or freezer turn-in and recycling | \$60.00 | Unit |
| Room AC turn-in and recycling | \$15.00 | Unit |
| Dehumidifier turn-in and recycling | \$15.00 | Unit |
| High efficiency electric water heater (EF \geq .95) | \$25.00 | Unit |
| High efficiency heat pump water heater (EF \geq 2.0) | \$150.00 | Unit |
| Low flow showerheads/aerators (electric water heaters) | Free | Unit |
| Furnace with ECM blower | \$150.00 | Unit |
| Central air-conditioning tune-up | \$50.00 | Unit |
| CAC - SEER 15 | \$150.00 | Unit |
| CAC - SEER 16 | \$250.00 | Unit |
| CAC - SEER 17/18 | \$250.00 | Unit |

| <i>Residential Measures</i> | <i>Proposed Incentive</i> | <i>Unit</i> |
|--|---------------------------|-------------|
| Weatherization measures (central air conditioning savings) | \$50-\$150 | Per measure |
| High-efficiency pool pump | \$30-\$50 | Unit |
| Solar water heating system | \$450.00 | Unit |
| Photovoltaic system | \$1,600.00 | Per kW |

| <i>C&I Measures - Lighting</i> | <i>Proposed Incentive</i> | <i>Unit</i> |
|---|---------------------------|----------------|
| Central Lighting Control | \$600 | 10,000 sq. ft. |
| CFLs (or other new high efficiency lighting technology) | \$1.50 | Lamp |
| CFL High Wattage | \$8.00 | Lamp |
| CFL Specialty Lamp | \$4.00 | Lamp |
| CFL Fixture | \$20.00 | Lamp |
| CFL Reflector Flood | \$8.00 | Lamp |
| Cold Cathode | \$3.00 | Lamp |
| LED Recessed Downlight – Energy Star Qualified | \$20.00 | Fixture |
| Daylight Sensor controls | \$900.00 | 10,000 sq ft |
| De-lamping | \$3.00-\$10.00 | Lamp |
| Exterior Lighting Bi-level Cont with override 150 to 1000 HID | \$50.00 | Fixture |
| Exterior HID replacement to 175W HID retrofit | \$45.00 | Fixture |
| Exterior HID replacement above 175W to 250W HID retrofit | \$65.00 | Fixture |
| Exterior HID replacement above 250W to 400W HID retrofit | \$120.00 | Fixture |
| Garage HID replacement to 175W HID retrofit | \$100.00 | Fixture |
| Garage HID replacement above 175W to 250W HID retrofit | \$150.00 | Fixture |
| Garage HID replacement above 250W to 400W HID retrofit | \$180.00 | Fixture |
| High Bay 3L T5HO Replacing 250W HID | \$35.00 | Fixture |
| High Bay 4LT5HO Replacing 400W HID | \$70.00 | Fixture |
| High Bay 6L T5HO Double fixture replace 1000W HID | \$120.00 | Fixture |
| High Bay 6L T5HO replacing 400W HID | \$30.00 | Fixture |
| High Bay Fluorescent 4ft Replacing 400W HID | \$50.00 | Fixture |
| High Bay Fluorescent 6ft Replacing 400W HID | \$75.00 | Fixture |
| High Bay Fluorescent 8ft Replacing 400W HID | \$50.00 | Fixture |

| <i>C&I Measures - Lighting</i> | <i>Proposed Incentive</i> | <i>Unit</i> |
|---|---------------------------|-------------|
| High Bay Fluorescent 8ft Replacing 1000W HID | \$160.00 | Fixture |
| 42W 8 Lamp Hi Bay CFL | \$35.00 | Fixture |
| HPT8 4ft 1 lamp, replace T8 | \$2.00 | Fixture |
| HPT8 4ft 2 lamp, replace T8 | \$3.00 | Fixture |
| HPT8 4ft 3 lamp, replace T8 | \$4.00 | Fixture |
| HPT8 4ft 4 lamp, replace T8 | \$5.00 | Fixture |
| LED Exit Signs Electronic Fixtures -Retrofit Only | \$12.50 | Fixture |
| Low Watt T8 lamps | \$.75 | Lamp |
| LW HPT8 4ft 1 lamp, replace T8 | \$5.00 | Fixture |
| LW HPT8 4ft 2 lamp, replace T8 | \$10.00 | Fixture |
| LW HPT8 4ft 3 lamp, replace T8 | \$15.00 | Fixture |
| LW HPT8 4ft 4 lamp, replace T8 | \$20.00 | Fixture |
| Occupancy Sensors over 500 W | \$30.00 | per sensor |
| Occupancy Sensors under 500 W | \$50.00 | per sensor |
| Pulse Start Metal Halide retrofit only | \$30.00 | Fixture |
| T8 2ft 1 lamp | \$3.00 | Fixture |
| T8 2ft 2 lamp | \$4.00 | Fixture |
| T8 2ft 3 lamp | \$6.00 | Fixture |
| T8 2ft 4 lamp | \$8.00 | Fixture |
| T8 3ft 1 lamp | \$3.00 | Fixture |
| T8 3ft 2 lamp | \$4.00 | Fixture |
| T8 3ft 3 lamp | \$5.00 | Fixture |
| T8 3ft 4 lamp | \$7.00 | Fixture |
| T8 4ft 1 lamp | \$4.00 | Fixture |
| T8 4ft 2 lamp | \$7.00 | Fixture |

| <i>C&I Measures - Lighting</i> | <i>Proposed Incentive</i> | <i>Unit</i> |
|--|---------------------------|----------------|
| T8 4ft 3 lamp | \$10.00 | Fixture |
| T8 4ft 4 lamp | \$13.00 | Fixture |
| T8 8ft 1 lamp | \$4.00 | Fixture |
| T8 8ft 2 lamp | \$7.00 | Fixture |
| Switching Controls for Multilevel Lighting | \$600.00 | 10,000 sq. ft. |

| <i>C&I Prescriptive Measures - HVAC</i> | <i>Proposed Initial Incentive</i> | <i>Unit</i> |
|---|-----------------------------------|-------------------|
| AC < 65,000 (1ph 14 SEER Min; 3ph 11.6 EER Min) | \$6.00 | Ton |
| AC 65,000 – 134,000, 11 EER | \$15.00 | Ton |
| AC 135,000-239,000, 11 EER | \$15.00 | Ton |
| AC 240,000-759,000, 10 EER | \$10.00 | Ton |
| Air Cooled Chiller | \$30.00 | Ton |
| ASHP < 65,000 (1ph 14 SEER Min; 3ph 11.6 EER Min) | \$20.00 | Ton |
| ASHP 65,000 – 134,000, 11 EER | \$20.00 | Ton |
| ASHP 135,000-239,000, 11 EER | \$25.00 | Ton |
| ASHP 240,000-759,000, 10 EER | \$30.00 | Ton |
| Anti Sweat Heater Control | \$80.00 | door |
| Economizer | \$8.00 | Ton |
| GSHP < 135,000, 17 EER | \$50.00 | Ton |
| GSHP < 135,000, 19 EER | \$50.00 | Ton |
| Water Cooled Chiller < 150 Ton | \$25.00 | Ton |
| Water Cooled Chiller 150-300 Ton | \$40.00 | Ton |
| Water Cooled Chiller > 300 Ton | \$40.00 | Ton |
| Efficient Condenser | \$100.00 | Ton |
| Energy Management System | \$5.00 | 1,000 sq ft |
| High Performance Glazing | \$30.00 | 100 sq ft glazing |
| PTAC – 10% Improvement | \$5.00 | Ton |
| PTAC-HP – 10% Improvement | \$10.00 | Ton |
| Window Film | \$.30 | 100 sq ft glazing |
| ENERGY STAR Room AC > 14,000 BTU/hr | \$25.00 | Unit |
| Setback Thermostat | \$20.00 | Unit |

| <i>C&I Prescriptive Measures – Other</i> | <i>Proposed Initial Incentive</i> | <i>Unit</i> |
|---|-----------------------------------|-------------|
| Variable Frequency Drives | \$60.00 | HP |
| Vending Equipment Controller | \$50.00 | Unit |
| ENERGY STAR Commercial Solid Door Freezers less than 20ft3 | \$75.00 | Unit |
| ENERGY STAR Commercial Solid Door Freezers 20 to 48 ft3 | \$100.00 | Unit |
| ENERGY STAR Commercial Solid Door Freezers more than 48ft3 | \$150.00 | Unit |
| ENERGY STAR Commercial Solid Door Refrigerators less than 20ft3 | \$75.00 | Unit |
| ENERGY STAR Commercial Solid Door Refrigerators 20 to 48 ft3 | \$100.00 | Unit |
| ENERGY STAR Commercial Solid Door Refrigerators more than 48ft3 | \$150.00 | Unit |
| ENERGY STAR Hot Holding Cabinets Full Size | \$600.00 | Unit |
| ENERGY STAR Hot Holding Cabinets Half Size | \$300.00 | Unit |
| ENERGY STAR Hot Holding Cabinets Three Quarter Size | \$400.00 | Unit |
| ENERGY STAR Ice Machines less than 500 lbs per 24 hrs | \$300.00 | Unit |
| ENERGY STAR Ice Machines 500 to 1000 lbs | \$450.00 | Unit |
| ENERGY STAR Ice Machines more than 1000 lbs | \$1,000.00 | Unit |
| ENERGY STAR Steam Cookers 3 Pan | \$450.00 | Unit |
| ENERGY STAR Steam Cookers 4 Pan | \$600.00 | Unit |
| ENERGY STAR Steam Cookers 5 Pan | \$750.00 | Unit |
| ENERGY STAR Steam Cookers 6 Pan | \$900.00 | Unit |
| Pre Rinse Sprayers | \$25.00 | Unit |
| Guestroom Energy Management Control | \$65.00 | Room |
| Engineered Nozzles – Compressed Air | \$100.00 | Unit |
| Barrel Wraps Injection Mold and Extruders | \$1.00 | Unit |
| ECM Cooler and Freezer Motors | \$60.00 | Unit |
| ECM Case Motors | \$30.00 | Unit |
